- ✓ Electric fans

NO thanks

- ✗ Large household appliances, e.g.:
 - washing machines
 - cookers
 - fridges
 - tumble dryers
 - dishwashers
- ✗ Large televisions

How do I recycle my electrical items?

Put them in the Mind collection bag, if they fit, or wrap the Mind collection bag around them and present them with your recycling. The items must be visible by the Mind collection team.

Can I put the electrical items in the bag with the textiles?

Yes, you can.

What happens to the electrical items put out for recycling?

Mind will sort out the working items, test them and sell them on in their shops. If the item is not working, we will send it to a company in Lincolnshire. There it will be broken down and the parts recycled. Any plastic on the electrical item will also be recycled.

How can I dispose of larger electrical equipment?

You can take it to the Household Waste Recycling Centre at Whetstone or ask the Council for a bulky waste collection (chargeable).

How often will they be collected?

Please put your items out with your recycling every fortnight.

Who do I contact if my electrical items have not been collected?

Please contact the Mind warehouse on 0116 278 0865.

What do I do if I'm unsure as to whether the item can be taken by Mind?

Please contact our Customer Services Team for further advice.

When can I start putting electrical items out for collection?

On your first recycling collection in January 2012.
