

Sustainable Development

Blaby District Council's Sustainable Community Strategy (2008) focuses on creating a "clean, attractive and sustainable environment". In order to achieve this the council will:

- Ensure Sustainable Development is a key consideration in our decision making processes.
- Consider how 'the code of sustainable homes' can be included in planning requirements for all new homes.
- Work closely with development partners to encourage Sustainable Development.
- Work in partnership with a wide range of public and private agencies to assist the Council in delivering achievable targets both for the District and Leicestershire.

Our Action Points in achieving these goals are:

- Develop a specific policy approach for Sustainable Development.
- Bring internal and external partners together to form a Strategic Housing Group to promote a Sustainable Development approach.
- Develop a housing and planning protocol which ensures a consistent, considered and relevant approach on Sustainable Development is taken in relation to all new developments in Blaby.
- Promote the use of renewable energy sources for new developments.
